

Angela Wu

Postdoc at LSU

(before that PhD at UCL,
before that undergrad at the
University of Toronto)

Research Interests

- Symplectic and contact geometry
- Low dimensional topology
- Legendrian knots
- Symplectic fillings
- Weinstein manifolds
- Lagrangian cobordisms and concordance

A braid-y result

If Λ is a Legendrian knot which is Lagrangian concordant to and from the max tb Legendrian unknot, then Λ cannot smoothly be the closure of a 3-braid.
